## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-3,8-11 rejected under 35 U.S.C. 102(b) as being clearly anticipated by Cheng.

Cheng discloses a computer 5(s) with a cooling air guide composed of a connecting part consisting of the unnumbered hood attached to the top of fan 42 attached to the computer through which cooling air enters and a hood or cover 41 placed over component (CPU) 50 which conducts the cooling air from the connecting part to component 50. Hood 41 is fastened in a laterally moveable manner (fastened movably) to the connecting pad by air-in tube 43 which is flexible as shown in fig. 3 and 4. Tube 43 is a common bellows type flexible pipe that allows for lateral movement. Hood 41 would have a U-shaped cross section as would be seen in fig. 4 when a cross sectional view is taken through hood 41 in fig. 4. Hood 41 is matched in width with the size of component 50. Hood 41 is closed on at least an end side. Regarding claim 9, hood 41 has a connection or outlet 41 1 for receiving a cooling air hose 44, col. 2, lines 55-60. Regarding claim 10, the connecting part is connected to fan 42. The added language of adjoining is considered very broad. The unnumbered hood is adjoined by tube 43, outlet 410 and unnumbered outlet on the unnumbered hood to hood 41 in figs. 3 and 5 just as hood 2 is adjoined by hinges 3 to connecting part 1 of instant case.

2. Claims 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all the limitations of the base claim and any intervening claims. The cited art does not teach nor suggest film hinges fastening the hood to the connecting pad, hinges are parallel, tabs on the connecting pad preventing air from exiting the side of the air duct of the connecting part as claimed in claims 4 -7.

### ***Response to Arguments***

3. Applicant's arguments filed 5/31/05 have been fully considered but they are not persuasive. The unnumbered hood is adjoined by tube 43,outlet 410 and unnumbered outlet on the unnumbered hood to hood 41 as discussed above in paragraph 1.
